PROFILE

I am a passionate and highly motivated Data Insights and MDM Manager with a passion for helping organisations derive actionable from their data. I bring flexibility, honesty and drive to all opportunities and thrive in managing change and innovation. With technical, consulting and management experience I bring a structured approach to all new challenges and feel I am an asset to all those I have worked for.

WORK EXPERIENCE

Data Insights & MDM Manager, AI Lead, UK & IE 2023 - PRESENT
Covetrus UK

- Implementation of new BI tool (Qlik Sense) with a focus on usability and design supporting users drive growth throughout the business.
- Effective management of a team of four with wide ranging responsibilities.
- Driving local AI strategy and adoption to realise direct value from the technology through enablement and project delivery.

Solutions Developer May 2023 - Dec 2023
BCN Group

- Consultant Power BI developer for healthcare and manufacturing clients.
- Used various project management techniques to deliver highly usable reports
- Worked on frameworks to ensure consistent quality and accuracy of deliverables

Junior Product Engineer (Data Monetisation) 2021- 2023
Covetrus (Technical Solutions)

- Leveraged Power BI development skill to create highly usable analytics services that use web like navigation and modern visual design standards.
- Provided technical contributions and direction to the adoption of azure ETL process to centralise 1000+ on premise servers in order to create more valuable analytics.

EDUCATION 2019 - 2023

BSc Information Technology Management for Business
Edinburgh Napier University (Graduate Apprenticeship)

- Development Methodologies
- Project Management
- Foundational Technical Skills
